

Table of Contents

Abstract.....	I
Zusammenfassung.....	II
Contribution of Authors.....	III
Publications.....	IV
Dedication.....	V
Acknowledgments.....	VI
Table of Contents.....	VII
List of Tables.....	XI
List of Figures.....	XII
List of Symbols and Abbreviations.....	XV
Chapter 1.....	1
1. General Introduction.....	1
1.1 Maillard reaction.....	1
1.1.1 The initial stage of the Millard Reaction.....	2
1.1.2 The Intermediate stage of the Millard Reaction.....	3
1.1.3 The final stage of the Millard Reaction.....	4
1.2 Complementary methods used for melanoidin characterization.....	7
1.3 Fourier transform infrared spectroscopy (FTIR).....	8
1.4 Molecular oscillations and degrees of freedom.....	9
1.5 Finger print spectra.....	11
1.6 Physical background of IR absorption and Raman scattering.....	13
1.7 Objective of the thesis.....	16
1.8 References.....	18
Chapter 2.....	24
Motivation of chapter 2.....	24
Research Article.....	25
Abstract.....	26
2.1 Introduction.....	26
2.2 Materials and methods.....	28
2.2.1 Chemicals and reagents.....	28
2.2.2 Preparation of model melanoidins.....	28
2.2.3 Dialysis of melanoidin compounds.....	28

2.2.4 UV/Vis spectroscopy.....	28
2.2.5 FTIR Spectroscopy – Sample preparation.....	29
2. 2.6 FTIR Spectroscopy – Instrumentation and Data Acquisition	29
2.2.7 MALDI-ToF-MS.....	29
2.2.8 Solid state NMR spectroscopy – Instrumentation and data acquisition.....	30
2.2.9 EPR analysis of radical structures.....	30
2.2.10 Determination of Molecular Weight Distribution with SEC.....	30
2.2.11 Elemental analysis.....	30
2.3 Results and discussion.....	31
2.3.1 Color formation and determination of molecular weight distribution of melanoidins.....	31
2.3.2 IR spectra of Glc and Ala.....	32
2.3.3 IR spectra of melanoidins.....	34
2.3.4 Solid state NMR spectra and EA of melanoidins.....	36
2.2.3.5 EPR spectra of melanoidins.....	39
2.3.6 MALDI-ToF-MS spectra of melanoidins.....	40
2.4 Conclusions.....	41
Acknowledgments.....	41
Abbreviations.....	41
2.5 References.....	43
Appendix.....	47
Discussion of insights into the structure of investigated melanoidins from chapter 2.....	51
Chapter 3.....	51
Motivation of chapter 3.....	51
Research Article.....	52
Abstract.....	53
3.1 Introduction.....	53
3.2 Materials and methods.....	55
3.2.1 Chemicals and reagents.....	55
3.2.2 Preparation of model melanoidins in aqueous solution.....	55
3.2.3 Control experiments - thermal treatment of pure carbohydrate compounds and Ala.....	56
3.2.4 Preparation of food melanoidins.....	56

3.2.5 UV/Vis spectroscopy.....	56
3.2.6 FTIR Spectroscopy – Instrumentation and Data Acquisition.....	56
3.2.7 Multivariate studies – PCA on carbohydrate-alanine variations.....	56
3.3 Results and discussion.....	57
3.3.1 Extinction spectra of melanoidins.....	57
3.3.2 FTIR analysis of the pure compounds.....	58
3.3.3 FTIR spectra of melanoidins – univariate analysis on aqueous model systems.....	60
3.3.4 FTIR signatures of melanoidins from food.....	63
3.3.5 Multivariate analysis - PCA of model and food melanoidin samples.....	64
3.3.6 PC score diagrams.....	65
3.3.7 PCA loadings.....	67
3.4 Conclusions.....	69
Acknowledgments.....	69
Abbreviations.....	69
3.5 References.....	71
Appendix.....	75
Discussion of insights into the structure of investigated melanoidins from chapter 3.....	78
Chapter 4.....	78
Motivation of chapter 4.....	78
Research Article.....	79
Abstract.....	80
4.1 Introduction.....	80
4.2 Materials and methods.....	82
4.2.1 Chemicals and reagents.....	82
4.2.2 Preparation of melanoidins from Glucose and Alanine.....	82
4.2.3 Synthesis of Fructosylalanine.....	82
4.2.4 Preparation of melanoidins from fructosylalanine.....	82
4.2.5 FTIR Spectroscopy – Instrumentation and Data Acquisition.....	83
4.2.6 Solid state NMR spectroscopy – instrumentation and data acquisition.....	83
4.2.7 Raman spectroscopy – instrumentation and data acquisition.....	83
4.2.8 UV/Vis spectroscopy.....	83
4.2.9 Elemental analysis.....	83

4.3 Results and discussion.....	84
4.3.1 UV/Vis spectra of melanoidins and Fructosylalanine.....	84
4.3.2 FTIR investigations.....	85
4.3.3 MIR spectra of pure Ala and Glc compounds.....	85
4.3.4 MIR spectra of melanoidins and Fructosylalanine.....	85
4.3.5 Amide I and amide II amount in Glc/Ala melanoidin and Glc/Ala melanoidin from fructosylalanine.....	90
4.3.6 Derivative spectra of Glc/Ala and melanoidins and Fructosylalanine.....	91
4.3.7 Raman spectra of Fructosylalanine.....	92
4.3.8 ¹³ C NMR spectra of Glc/Ala melanoidins and Fructosylalanine.....	93
4.3.9 Elemental analysis.....	95
4.4 Conclusions.....	96
Acknowledgments.....	97
Abbreviations.....	98
Conflicts of interest.....	98
4.5 References.....	98
Appendix.....	100
Discussion of insights into the structure of investigated melanoidins from chapter 4.....	102
Chapter 5.....	102
5.1 Connection between the different works and Overarching interpretation and discussion.....	102
5.2 References.....	108
