Acknowledgment.....	ix
Abstract	xi
Zusammenfassung.....	xiii
Table of contents	xv
List of Figures.....	xviii
List of Tables.....	xx
List of Supporting Figures.....	xxi
List of Supporting Tables	xxiv
Abbreviations	xxv
1 Introduction.....	1
1.1 The 21st century and the CO ₂ challenge	1
1.1.1 Environmental considerations.....	1
1.1.2 Strategies.....	2
1.1.3 Power to gas technology: towards methane production.....	3
1.2 Methanation reaction	5
1.2.1 Past current and future	5
1.2.2 Thermodynamics	6
1.2.3 Choice of catalysts: the Ni, MgO system	8
1.2.4 Mechanistic considerations.....	10
1.3 Aims and outline of the present work.....	13
1.4 References.....	14
2 CO ₂ activation on Ni _x Mg _{1-x} O single atom catalysts.....	19
2.1 Introduction.....	20
2.2 Experimental	22
2.2.1 Catalysts preparation	22

2.2.2	Characterization	22
2.2.3	Computational details	24
2.3	Results and discussion	26
2.3.1	Structural analysis of phase pure precursors and catalysts	26
2.3.2	Dispersion	28
2.3.3	Elemental composition	28
2.3.4	Catalytic testing	30
2.3.5	Characterization after catalysis	32
2.4	Final discussion	35
2.5	Conclusions	37
2.6	Acknowledgments	37
2.7	References	38
2.8	SUPPORTING INFORMATION	42
3	Surface titration of supported Ni catalysts by O ₂ -pulse thermal analysis	65
3.1	Introduction	66
3.2	Experimental	68
3.2.1	Catalysts preparation	68
3.2.2	O ₂ and N ₂ O pulse titration	68
3.2.3	H ₂ pulse titration	70
3.2.4	TEM	70
3.3	Results and discussion	71
3.3.1	Application to a MgO supported Ni catalyst: Ni ₅	71
3.3.2	Titration of two different samples series by O ₂ Pulse TA	74
3.3.3	Qualitative validation: comparison with established method	76
3.3.4	Quantitative validation: subsurface oxidation?	77
3.3.5	Other probe molecules and techniques	82

3.3.6	O ₂ Pulse TA [®] advantages	83
3.4	Conclusions.....	84
3.5	Acknowledgments	84
3.6	References.....	85
3.7	SUPPORTING INFORMATION.....	89
4	Highly dispersed Ni ⁰ /Ni _x Mg _{1-x} O model catalysts derived from solid solutions: How metal and support control the CO ₂ hydrogenation	93
4.1	Introduction.....	94
4.2	Experimental methods	96
4.3	Results and Discussion	99
4.3.1	Synthesis and Characterization of the precatalyst.....	99
4.3.2	Characterization of the catalysts.....	103
4.3.3	Catalytic testing	107
4.4	Final discussion and conclusion.....	111
4.5	Acknowledgments	113
4.6	References.....	114
4.7	SUPPORTING INFORMATION.....	117
5	Summary and final conclusion	133
