Abstract	I
Zusammenfassung	III
Acknowledgements	IX
List of abbreviations	XI
1 Introduction	1
2 State of the Art	3
2.1 The drug testing dilemma	3
2.2 Microphysiological systems	4
2.3 HUMIMIC Chips	5
2.4 Microphysiological systems automation	8
3 Aim of this work	19
4 Methodical Design of HUMIMIC Chip cultivation automation	23
4.1 Design Work Flow	24
4.2 Planning	27
4.3 Design	28
4.3.1 Problem analysis	28
4.3.2 Solutions	31
4.3.3 Concept	33
4.4 Implementation	36
4.5 Documentation	37
5 Results	39
5.1 Requirements to HUMIMIC Chip cultivation automation	39
5.2 Description of the HUMIMIC Chip robot	41
5.2.1 Platform layer	44
5.2.2 Handling layer	48
5.2.3 Optical measurement layer	52
5.2.4 Cold storage layer	53
5.2.5 Safety cabinet	55
5.2.6 Software	57
5.2.7 Electrical wiring and cabinet	60
5.2.8 Assembly and maintenance	60
5.2.9 Safety	62

5.3	Evaluation of the functionality of the HUMIMIC Chip robot . . .	64
5.3.1	Cultivation conditions: Pumping	65
5.3.2	Cultivation conditions: Temperature	78
5.3.3	Cultivation conditions: pH-stabilization	90
5.3.4	Hindering contamination	90
5.3.5	Medium accuracy and persistence	100
5.3.6	Assay execution	113
5.3.7	Optical analysis	118
5.3.8	Supplies and procurement	122
5.3.9	Safety and Usability	125
5.3.10	Assembly and Maintenance	127
6	Discussion	131
6.1	Requirements to HUMIMIC Chip cultivation automation	131
6.2	Feasibility of HUMIMIC Chip cultivation automation	131
6.2.1	Medium circuit flow	132
6.2.2	Temperature	133
6.2.3	pH-stabilization	136
6.2.4	Contamination prevention	137
6.2.5	Medium accuracy and persistence	139
6.2.6	Assay execution	140
6.2.7	Optical analysis	142
6.2.8	Procurement and supplies	144
6.2.9	Usability and safety	146
6.2.10	Manufacturing, assembly and maintenance	147
6.2.11	Comparison to reported MPS automation approaches . .	148
6.3	Comparison to manual MPS cultivation and animal testing . .	152
6.3.1	Personnel deployment	154
6.3.2	Through-put and scalability of experiments	157
6.3.3	Reproducibility	158
6.3.4	Data output	159
6.3.5	Physiological cultivation	160
6.3.6	Safety	161
6.3.7	Operating costs	162
7	Conclusion and Outlook	165
8	References	171
9	Theses	181

Appendix	i
A Contributions	i
B Methodical design process documents	iii
B.1 Requirements list	iii
B.2 Concept Decisions	xi
C Measurement device data	xxi
C.1 Pressure measurement	xxi
C.1.1 Code	xxi
C.1.2 Additional measurement	xxv
C.2 Temperature measurement	xxxvii
C.2.1 Code	xxxvii
Curriculum vitae	xliii
