ACKNOWLEDGEMENT	III
ABSTRACT	V
0 List of Symbols	VII
1 Introduction.....	1
2 State of the Art	3
2.1 Laser and Laser-Hybrid Welding.....	3
2.1.1 Main Process Features.....	3
2.1.2 Impact of the Welding Process on the Local Weld Solidification and Thermomechanical Conditions	7
2.2 Solidification Cracking Phenomena	11
2.2.1 Theoretical Models and Criteria.....	11
2.2.2 Influencing Factors	21
2.2.3 Formation of Centreline Solidification Cracks by Laser and Laser-Hybrid Welding.....	33
2.3 Assessment of Solidification Cracking Susceptibility	38
2.3.1 Classification of Hot Cracking Tests.....	38
2.3.2 Hot Cracking Testing for Laser Beam Welding	39
2.3.3 Qualification/Quantification of the Hot Cracking Susceptibility Applied for LBW.....	44
3 Experimental Approach	51
3.1 Materials.....	51
3.1.1 Low Carbon High Strength Steels	51
3.1.2 Stainless Steels	55
3.2 Welding Technique and Equipment	60
3.2.1 Fibre Laser Welding	60
3.2.2 Laser-GMA Hybrid Welding.....	61
3.2.3 CO ₂ -Laser Welding.....	62
3.3 Experimental Setup and Test Procedure	63
3.3.1 IRC-test	63
3.3.2 CTW-Test	65
3.4 Design of Experiments	67
3.4.1 IRC-Test	67
3.4.2 CTW-test	70
3.5 Examination Techniques and Procedure	72
3.6 Non-Destructive Testing (NDT).....	72
3.6.1 Metallography	74
3.6.2 Scanning Electron Microscopy SEM/ Electron Probe MicroAnalysis EPMA	74
3.6.3 Electron Backscattered Diffraction EBSD.....	75
3.6.4 Auger Electron Spectroscopy (AES)	75
4 Results	77
4.1 Self-restraint IRC-Test	77
4.1.1 Laser and Laser-Hybrid Welds	77

4.2	Externally Loaded CTW-test	97
4.2.1	Partial Penetration Bead on Plate Laser Welds	98
4.2.2	Full Penetration Laser Welds	107
5	Discussion	119
5.1	Evaluation of Solidification Crack Features by Laser Beam and Laser-Hybrid Welding	119
5.1.1	Examination Technique Route for a Solid and Reliable Qualification and Quantification of Solidification Cracks	119
5.1.2	Characteristics of Solidification Cracks Encountered by Laser Beam and Laser-Hybrid Welding	121
5.2	Evaluation of the Hot Cracking Susceptibility and Influencing Factors	123
5.2.1	Self-Restraint IRC-Test in Combination with Laser Beam and Laser-Hybrid Welding.....	123
5.2.2	Externally Loaded CTW-Test in Combination with Laser Beam Welding.	135
5.3	Evaluation of Solidification Cracking Mechanisms and Criteria by LBW.....	147
5.3.1	Mechanisms of Solidification Centreline Crack Formation and Growth and Suitable Criteria for LBW	147
5.4	Suitability of Hot Cracking Tests for LBW	159
5.4.1	Evaluation of Hot Cracking Test Methods for LBW	159
5.4.2	Evaluation of the IRC- and CTW-Test Suitability for Hot Cracking Evaluation during LBW	163
6	Summary	165
