

# Contents

<b>1. Introduction</b>	<b>9</b>
1.1. Experimental Setup . . . . .	13
<b>2. Main Contributions</b>	<b>15</b>
<b>3. State of the Art Video Coding</b>	<b>19</b>
3.1. Video Coding Standards . . . . .	19
3.2. Hybrid Video Codecs . . . . .	20
3.2.1. Partitioning . . . . .	20
3.2.2. Intra Prediction . . . . .	23
3.2.3. Inter Prediction . . . . .	24
3.2.4. Transform Coding, Quantization and Residual Coding . . . . .	26
3.2.5. In-Loop Filter . . . . .	27
3.2.6. Context Adaptive Binary Arithmetic Coding (CABAC) . . . . .	28
3.3. Rate-Distortion Optimization . . . . .	31
<b>4. Adaptive Filtering Using an Anisotropic Diffusion Model</b>	<b>33</b>
4.1. Uniform Diffusion Model . . . . .	34
4.2. Perona-Malik Diffusion Model . . . . .	34
4.3. Anisotropic Diffusion Model . . . . .	35
4.4. Theoretical Foundations . . . . .	36
4.4.1. Existence and Uniqueness of Minimizers . . . . .	36
4.4.2. Scale-space Properties . . . . .	37
4.5. Finite Discretization and Implementation . . . . .	40
4.5.1. Implementation . . . . .	40
4.5.2. Finite Discretization of the Uniform Diffusion Model . . . . .	42
4.5.3. Finite Discretization of the Anisotropic Diffusion Model . . . . .	43
4.6. Parameter Tests . . . . .	49
4.7. Decreasing Coder Complexity . . . . .	54
4.7.1. All Intra . . . . .	54
4.7.2. Random Access . . . . .	57
4.8. Results . . . . .	66
<b>5. Adaptive Filtering Using the Alternating Direction Method of Multipliers</b>	<b>69</b>
5.1. A Variational Optimization Approach . . . . .	69
5.2. Incorporating Structural Knowledge . . . . .	70
5.2.1. Overall Smoothing . . . . .	70
5.2.2. Prior Information on Direction of Edges . . . . .	70
5.3. Theoretical Foundations . . . . .	71
5.3.1. Total Variation . . . . .	72

5.3.2. Directional Total Variation . . . . .	73
5.4. Predecessors of ADMM . . . . .	74
5.4.1. Dual Ascent . . . . .	74
5.4.2. Augmented Lagrangians and the Method of Multipliers . . . . .	75
5.4.3. Alternating Direction Method of Multipliers . . . . .	76
5.5. Finite Discretization and Implementation . . . . .	77
5.5.1. Implementation . . . . .	78
5.5.2. Alternating Direction Method of Multipliers . . . . .	79
5.5.3. Gradient Projection Method . . . . .	80
5.5.4. Finite Discretization . . . . .	82
5.6. Parameter Tests . . . . .	83
5.7. Results . . . . .	87
<b>6. Comparison and Combined Results</b>	<b>91</b>
6.1. Similarities in a Continuous Setting . . . . .	91
6.2. Combination of Both Filters . . . . .	92
<b>7. Conclusion</b>	<b>97</b>
<b>8. Bibliography</b>	<b>99</b>
<b>Appendices</b>	<b>105</b>
<b>A. Acronyms</b>	<b>107</b>
<b>B. Glossary</b>	<b>111</b>
<b>C. Configuration Files</b>	<b>119</b>
C.1. All Intra Configuration . . . . .	119
C.2. Random Access Configuration . . . . .	121
C.3. Per Sequence Configurations . . . . .	125
<b>D. Decreasing Coder Complexity: Tables</b>	<b>127</b>
D.1. All Intra Tables . . . . .	127
D.2. Random Access Tables . . . . .	131
D.2.1. Random Access Tables, 17 Frames . . . . .	131
D.2.2. Random Access Tables, Full Sequences . . . . .	134
<b>E. Related Contributions</b>	<b>137</b>
