

# Contents

<b>1 Preamble</b>	<b>1</b>
<b>2 Introduction to Semiconductor Optical Amplifiers (SOAs)</b>	<b>11</b>
2.1 Basics of SOAs . . . . .	11
2.1.1 Semiconductor Gain Media . . . . .	12
2.1.2 Theory of Semiconductor-Light Interaction . . . . .	15
2.2 Parameters of Optical Amplifiers . . . . .	18
2.2.1 Gain . . . . .	18
2.2.2 Gain Saturation - Saturation Power . . . . .	20
2.2.3 Gain Bandwidth . . . . .	20
2.2.4 Polarization Dependent Gain . . . . .	21
2.2.5 Noise Figure . . . . .	21
2.3 Dynamics of Conventional and QD SOAs . . . . .	22
2.3.1 About Slow and Fast Amplifiers . . . . .	22
2.3.2 Semiconductor Optical Amplifiers . . . . .	23
2.4 Summary . . . . .	26
<b>3 Samples and Characterization</b>	<b>31</b>
3.1 Epitaxial Structure, Processing and Post-Processing . . . . .	31
3.1.1 Epitaxial structure . . . . .	31
3.1.2 Processing . . . . .	32
3.1.3 Design and Post-Processing . . . . .	33
3.2 SOA Coupling Stage . . . . .	36
3.3 QD SOA Sample Series . . . . .	37
3.3.1 Overview . . . . .	37
3.3.2 Sample Series . . . . .	38
3.4 Comparison to Commercial O-Band Amplifiers . . . . .	43
3.5 Static Properties . . . . .	46
3.5.1 Gain Saturation and Sectioned SOAs . . . . .	46
3.5.2 Wavelength Dependence of the Polarized Emission . . . . .	49
3.6 Gain and Phase Dynamics . . . . .	50
3.6.1 QD GS Dynamics under GS Perturbation . . . . .	50
3.6.2 QD GS Dynamics under ES Perturbation . . . . .	53
3.6.3 QD ES Dynamics under GS Perturbation . . . . .	57
3.7 Summary . . . . .	58

<b>4 Introduction to System Experiments</b>	<b>65</b>
4.1 Test Pattern and Modulation Formats . . . . .	65
4.1.1 Pseudo-Random Bit Sequences . . . . .	65
4.1.2 Modulation Formats . . . . .	66
4.2 Principles of Optical Test Setups . . . . .	67
4.2.1 Transmitter . . . . .	68
4.2.2 Applications of Amplifiers . . . . .	69
4.2.3 Receivers . . . . .	70
4.3 Signal Quality Evaluation . . . . .	71
4.3.1 Bit-Error Ratio . . . . .	71
4.3.2 Eye Diagram and Q-Factor . . . . .	73
4.3.3 Error-Vector Magnitude . . . . .	74
4.4 Input Power Dynamic Range for Optical Amplifiers . . . . .	75
<b>5 Concept of Direct Phase Modulation</b>	<b>81</b>
5.1 Introduction and Concept . . . . .	81
5.2 Setup and Device Under Test . . . . .	82
5.3 Experimental results . . . . .	83
5.4 Summary . . . . .	86
<b>6 Signal Amplification</b>	<b>89</b>
6.1 On-Off Keying (OOK) Signals . . . . .	90
6.2 Differential (Quadrature) Phase-Shift Keying (D(Q)PSK) Signals . . . . .	94
6.2.1 Basic D(Q)PSK Setup and Device Under Test . . . . .	95
6.2.2 Single-Channel (D(Q)PSK) Amplification - IPRD . . . . .	97
6.2.3 DQPSK Amplification with one OOK Neighboring Channel . . . . .	103
6.3 Summary . . . . .	105
<b>7 Concept of Dual-Band Amplifiers</b>	<b>109</b>
7.1 Concept of a Dual-Band QD SOA . . . . .	110
7.2 Measurements . . . . .	111
7.2.1 Setup . . . . .	111
7.2.2 Device Under Test, ASE and Gain . . . . .	112
7.2.3 40 GBd OOK Signal Amplification . . . . .	115
7.3 Simulation . . . . .	119
7.3.1 Model Description . . . . .	119
7.3.2 ASE and Gain . . . . .	121
7.3.3 40 GBd OOK Signal Amplification . . . . .	122
7.4 Summary . . . . .	124
<b>8 Signal Processing - Wavelength Conversion</b>	<b>125</b>
8.1 Wavelength Conversion in SOAs . . . . .	126
8.2 Introduction to Four-Wave Mixing (FWM) . . . . .	127
8.2.1 Fundamentals of FWM in Semiconductors . . . . .	127
8.2.2 FWM Parameter Definition . . . . .	131
8.2.3 Wide-range FWM via Second Pump Signal . . . . .	132
8.3 Optimization of Static FWM . . . . .	133
8.3.1 Detuning Dependence . . . . .	133

8.3.2	Input Power Level Dependence . . . . .	134
8.3.3	Dependence of Spectral Position Relative to ASE Peak . . . . .	135
8.3.4	QD SOA Length Dependence . . . . .	136
8.3.5	Detuning Dependence for Dual-Pump Configuration . . . . .	136
8.3.6	Conclusion . . . . .	138
8.4	Wavelength Conversion of Phase-Coded Signals . . . . .	138
8.4.1	Short-Range FWM . . . . .	139
8.4.2	Wide-Range FWM . . . . .	140
8.5	Summary . . . . .	143
<b>9</b>	<b>Summary and Outlook</b>	<b>151</b>
<b>Appendix</b>		<b>157</b>
