Abstract I
Zusammenfassung III
Abbreviations VI
Table of figures VIII
List of tables X
1 Introduction 1
1.1 Plastics 1
1.2 Micro- and nanoplastics 3
1.3 The gastrointestinal tract 4
1.3.1 The intestinal barrier 5
1.4 The liver 6
1.5 In vitro models 8
1.5.1 Artificial digestion 8
1.5.2 In vitro uptake 9
1.6 Occurence and human exposure 10
1.7 Toxicokinetics 12
1.8 Toxicity 13
1.9 Risk assessment 14
2 Objective 15
3 Original manuscripts 16
3.1 Article I: Uptake and effects of orally ingested polystyrene microplastic particles *in vitro* and *in vivo* 17
3.1.1 Abstract 18
3.1.2 Introduction 18
3.1.3 Methods 20
3.1.4 Results 28
3.1.5 Discussion 38
3.1.6 Supplementary material description 42
3.2 Article II: Impact of artificial digestion on the sizes and shapes of microplastic particles 43
3.2.1 Abstract 44
3.2.2 Introduction 44
3.2.3 Methods 45
3.2.4 Results 48
3.2.5 Discussion 55
3.2.6 Conclusion 56
3.3 Article III (short communication): An inverse cell culture model for floating plastic particles 57
3.3.1 Abstract 58

3.3.2 Main Part....58
3.3.3 Supplementary material description....62
3.4 Article IV: Uptake and Cellular Effects of PE, PP, PET and PVC Microplastic Particles....63
3.4.1 Abstract....64
3.4.2 Introduction....64
3.4.3 Methods....65
3.4.4 Results....73
3.4.5 Discussion....78
3.4.6 Conclusion....81
3.4.7 Supplementary material description....81
4 Summarizing discussion....82
5 Future Perspectives....88
6 References....90
7 Supplementary material....102
7.1 Article I: Uptake and effects of orally ingested polystyrene microplastic particles *in vitro* and *in vivo*....102
7.2 Article III (short communication): An inverse cell culture model for floating plastic particles....110
7.3 Article IV: Uptake and Cellular Effects of PE, PP, PET and PVC Microplastic Particles....113
8 Congress contributions....118
9 Fundings....119
10 Acknowledgements....120
11 Selbstständigkeitserklärung....121
