

Contents

1	Introduction	13
1.1	Quantum Dot Gain Media	14
1.2	Optical Data Communication	17
1.2.1	Fiber Communications	18
1.2.2	Distributed Feedback Lasers	20
1.2.3	Electro-Absorption Modulators	21
1.3	Objectives and Structure of this work	21
2	Theoretical Background and Modeling	23
2.1	Fundamentals of Laser Diodes	23
2.1.1	Wave Guiding	25
2.1.2	Fabry-Perot Laser	27
2.1.3	Basic Laser Characteristics	29
2.2	Semiconductor Laser Diodes for Data Communication	32
2.2.1	Modulation Formats and Dynamic Characterization	33
2.2.2	Pseudo-Random Binary Sequence	35
2.2.3	High-Frequency Design	36
2.3	Quantum-Dot Distributed-Feedback Lasers	37
2.3.1	DFB Laser Diodes Types	38
2.3.2	Coupled-Wave Theory	39
2.3.3	Transfer-Matrix Method	41
2.3.4	Grating and Coupling Coefficient Design	43
2.3.5	Modeling of Spectral Characteristics	45
2.3.6	Simulation of DFB Laser Dynamics	45
2.4	Quantum-Dot Electro-Absorption Modulator	50
2.4.1	Basic Principle	50
2.4.2	Basic Modulator Characteristics	50
2.4.3	QD EAM Modeling	51
2.5	Mask Design	53
2.6	Conclusion	54

3	Device Fabrication	55
3.1	Epitaxy	55
3.1.1	Distributed Feedback Structure	56
3.1.2	Electro-Absorption Modulator Structure	57
3.1.3	Growth of Quantum Dots	58
3.1.4	P-Doped Active Region	59
3.1.5	InGaP-Cladding and Barrier	60
3.1.6	Grating Overgrowth	61
3.1.7	Wafer Analysis	63
3.2	Device Processing	65
3.2.1	Index-Grating Fabrication	65
3.2.2	Device Processing - Front-End	69
3.2.3	Device Finishing - Back-End	73
3.3	Device Samples	78
3.4	Conclusion	79
4	Setup and Measurement Methods	81
4.1	Coupling Station	81
4.2	Static Measurements	82
4.2.1	LIV-Characterization	83
4.2.2	Spectral Characterization	83
4.3	Dynamic Measurement Methods	84
4.3.1	Small-Signal Measurements	85
4.3.2	Large-Signal Measurements	86
4.4	Conclusion	86
5	Device Characterizations	89
5.1	QD DFB Laser	89
5.1.1	Static Characteristics	89
5.1.2	QD DFB Laser under Optical Injection	100
5.1.3	QD DFB Lasers for THz-Signal Generation	102
5.1.4	Dynamic Characterization	105
5.1.5	Yield and Lifetime	107
5.2	Electro-Absorption Modulator	108
5.2.1	Static Modulator Characteristics	108
5.2.2	Small-Signal Measurements	109
5.3	Conclusion	109

6	Optical Data Communication	111
6.1	On-Off-Keying	111
6.1.1	Directly Modulated QD DFB Laser Diode	112
6.1.2	QD Electro-Absorption Modulator	114
6.1.3	Electro-Absorption Modulated QD DFB Laser	116
6.1.4	Passive Feedback QD DFB Laser	117
6.2	4-Level Pulsed-Amplitude Modulation	118
6.3	Differential Phase-Shift Keying under direct modulation	120
6.4	80 Gb/s DQPSK Transmitter based on a QD DFB laser	122
6.5	Optical Data Processing - Wavelength Conversion	125
6.5.1	Non-Degenerated Four-Wave-Mixing	126
6.5.2	Cross-Gain-Modulation	127
6.6	Conclusion	128
7	Summary and Outlook	129
	Bibliography	132
	List of Acronyms	145
	Acknowledgment	149
