1	Chimera patterns in complex networks	1
1.1	Introduction	1
1.2	Historical note	2
1.3	Definition and main features	4
1.4	Quantitative measures	7
2	Amplitude chimeras and chimera death in ring networks	9
2.1	Introduction	9
2.2	Stuart-Landau model	10
2.3	Deterministic dynamics without delay	11
2.3.1	Amplitude chimeras and chimera death	12
2.3.2	Transient behavior of amplitude chimeras	16
2.3.3	Detection of transient time of amplitude chimeras	18
2.3.4	Role of initial conditions	20
2.3.5	Relative size of the incoherent domains	23
2.3.6	Impact of system size	25
2.3.7	Stability analysis of amplitude chimeras	27
2.3.8	Summary	36
2.4	The role of time delay	38
2.4.1	Time-delay model	39
2.4.2	Characterizing the transition from incoherence to coherence	42
2.4.3	The impact of various time delay types	44
2.4.4	Summary	58
2.5	The role of noise	59
2.5.1	Stochastic model	60
2.5.2	Deterministic chimera patterns	60
2.5.3	Influence of noise on transient times	63
2.5.4	Maps of dynamic regimes	68
2.5.5	Summary	71
2.6	Conclusions	71

3	Coherence-resonance chimeras in ring networks	73
3.1	Introduction	73
3.2	FitzHugh-Nagumo Model	74
3.3	Coherence-resonance chimeras without time delays	75
3.3.1	Coherence resonance in a single FitzHugh-Nagumo system	76
3.3.2	Chimera states in oscillatory and excitable regimes	77
3.3.3	Alternating behavior of coherence-resonance chimeras	78
3.3.4	Network dynamics in the presence of strong noise	83
3.3.5	Dynamic regimes: the impact of coupling parameters	84
3.3.6	Characterization of coherence-resonance chimera	85
3.3.7	Summary	88
3.4	Time-delayed feedback control of chimera states	89
3.4.1	Coherence-resonance chimeras in the presence of time-delayed feedback	90
3.4.2	Dynamic regimes in the presence of time-delayed feedback	93
3.4.3	Impact of the feedback on coherence resonance chimera existence: noise intensity range	95
3.4.4	Impact of the feedback on coherence resonance chimera existence: threshold parameter range	98
3.4.5	Summary	103
3.5	Conclusions	103
4	Towards realistic topologies: Coherence, incoherence and partial synchronization patterns	107
4.1	Introduction	107
4.2	Coherence resonance in multiplex networks	109
4.2.1	Model	111
4.2.2	Dynamics of isolated layers	111
4.2.3	Multiplex network: intra-layer coupling strength mismatch	113
4.2.4	A deterministic layer multiplexed with a noisy layer	114
4.2.5	Summary	116
4.3	Coherence-incoherence patterns in multiplex networks	117
4.3.1	Model	121
4.3.2	Dynamics of isolated layers	123
4.3.3	Multiplex network: coupling range mismatch	123
4.3.4	Multiplex network: coupling strength mismatch	127
4.3.5	Multiplex network: switching to solitary states	130
4.3.6	Summary	132
4.4	Coherence-incoherence patterns in networks with power-law coupling	133
4.4.1	Model	133
4.4.2	Dynamic regimes: impact of coupling parameters	135
4.4.3	Chimera states	135
4.4.4	Tree-like patterns	137
4.4.5	Solitary states	140

4.4.6	Transition patterns	146
4.4.7	Summary	148
4.5	Conclusions	149
