Contents

Acronyms **xv**

1 Introduction **1**
1.1 Towards Parallel Systems . . . 2
1.2 Towards Approximate Computing . . . 3
1.3 Motivation . . . 5
1.4 Research Questions . . . 13
1.5 Major Contributions . . . 16
1.6 List of Publications . . . 17
1.7 Thesis Organization . . . 18

2 Background **19**
2.1 Approximate Computing . . . 20
2.1.1 Hardware-based Techniques . . . 21
2.1.2 Software-based Techniques . . . 23
2.2 GPUs . . . 25
2.2.1 GPU Architecture . . . 26
2.2.2 GPU Vendors . . . 29
2.2.3 Programming Models . . . 30
2.2.4 Software Optimization Techniques for GPUs . . . 31
2.3 Polyhedral Model . . . 37
2.3.1 Iteration Domain . . . 39
2.3.2 Memory Access Functions . . . 39
2.3.3 Polyhedral Transformations . . . 41
2.3.4 Polyhedral Compilers . . . 41
2.4 Summary . . . 42

3 Related Work **43**
3.1 Background in Approximate Computing . . . 44
3.2 Approximate Computing on GPUs . . . 46
3.3 Approximation on Embedded Systems . . . 49

3.4 Compiler-based Approximation 51
3.5 Advances Over the State of the Art 55
3.6 Summary 56

4 Local Memory-Aware Kernel Perforation 57
4.1 Introduction 58
4.2 Overview 60
4.3 Kernel Perforation 61
4.3.1 From Loop to Kernel Perforation 61
4.3.2 Local Input Perforation 63
4.3.3 Perforation Schemes 64
4.3.4 GPU Perforation Schemes and Halos 65
4.4 Reconstruction 67
4.4.1 Reconstruction Techniques 68
4.5 Experimental Evaluation 69
4.5.1 Benchmarks 69
4.5.2 Input Data Sensitivity 70
4.5.3 Parametrization 73
4.5.4 Pareto Optimality 78
4.6 Summary 80

5 Kernel Perforation on Mobile GPUs 83
5.1 Introduction 84
5.2 Kernel Perforation on Mobile GPUs 86
5.3 Experimental Evaluation 87
5.3.1 Experimental Platforms 88
5.3.2 Benchmark Applications 89
5.4 Results 90
5.4.1 Performance on Three Platforms 90
5.4.2 Application Performance on Different Platforms 94
5.4.3 Execution Times 94
5.4.4 Analysis of the Error 96
5.4.5 Interpretation of the Experimental Results 96
5.5 Summary 97

6 Advanced Techniques for Automatic Loop Nest Perforation 99
6.1 Introduction . . . 100
6.2 ALONA . . . 103
6.2.1 Polyhedral Loop Nest Perforation . . . 104
6.2.2 Polyhedral Model . . . 104
6.2.3 Polyhedral Loop Perforation . . . 105
6.2.4 Extensions to Classical Loop Perforation . . . 107
6.3 Reconstruction . . . 107
6.4 Approximation Space Pruning . . . 110
6.4.1 Approximation Ordering . . . 111
6.4.2 Barvinok Counting Based Pruning . . . 112
6.5 Experimental Evaluation . . . 112
6.5.1 Benchmark Setup . . . 113
6.5.2 Discovered Solutions . . . 114
6.5.3 Reconstruction . . . 115
6.5.4 Evaluation of Perforation Configurations . . . 116
6.5.5 Approximation Space Pruning . . . 117
6.6 Summary . . . 118

7 Conclusions 121
7.1 Summary . . . 122
7.2 Conclusions . . . 124
7.3 Answers to Research Questions . . . 127
7.4 Future Work . . . 129
